The PALEONTOLOGICAL JOURNAL is a quarterly publication of the American Geological Institute, published in September, December, March, and June with supplemental support from the National Science Foundation. It is translated from "Paleontologicheskiy Zhurnal" on the advice of the AGI Translations Committee and with the cooperation of paleontologists of the U.S. Geological Survey, U.S. National Museum, and the Geological Survey of Canada. Accurate and faithful translation is intended so that the views expressed be those of the original authors and not those of the translators or the American Geological Institute.

In addition to the cover-to-cover translation of the original journal, the AGI staff provides supplementary information on Russian paleontological and stratigraphical literature, including book reviews, prepublication announcements, and a survey of current periodicals.

The PALEONTOLOGICAL JOURNAL has an annual index by subject, taxonomic names, and author, and an annual table of contents.
